邁智微電子股份有限公司

DevOps Engineer

公司簡介

Actiontec is a technology company founded in Silicon Valley, California in 1993, specializing in broadband access solutions to support a fully digital lifestyle. Known for its high-performance and easy-to-install products, Actiontec primarily serves North American telecom operators. Actiontec has shipped over 68 million connected home devices and has received more than 220 industry awards. It actively participates in organizations like the Wi-Fi Alliance and Broadband Forum, showcasing its commitment to innovation and quality. Actiontec Electronics Taiwan Co., Ltd., officially launched operations in December 2024, focusing on firmware development and testing for networking equipment. It currently operates as a wholly owned subsidiary of Cambridge Industries USA Inc., and is a member of Cambridge Industries Group (Shanghai).

主要商品 / 服務項目

- Wi-Fi Routers and Extenders: Efficient solutions for home networking.
- DSL Modems and Fiber Equipment: Enabling high-speed internet access.
- MoCA Network Adapters: Optimizing home network performance.
- Optim Management Platform: A service platform for remote network management, diagnostics, and optimization.

工作內容

1. Experienced in Docker and Kubernetes for development and operations.
2. Hands-on experience with CI/CD, GitOps, Terraform, Ansible, and Jenkins.
3. Knowledge of AWS or other public cloud platforms.
4. Basic understanding of networking and security (e.g., IAM, VPC, Firewall).

5. Solid understanding of software engineering fundamentals and development tools, including Git and other version control systems.

6. Monitor and optimize system performance, and troubleshoot any performance issues or failures.

7. Good collaboration skills with backend and platform teams.

8. Experience in IoT data processing or cloud streaming (e.g., Pub/Sub, Kafka) is a plus.

擅長工具

Jenkins、Git、MySQL、Linux、Cloud、hadoop、AWS、Version Control、DNS、TCP/IP
